

Sustainability Financing Starts With Data

Most comprehensive climate risk intelligence for ESG financing.

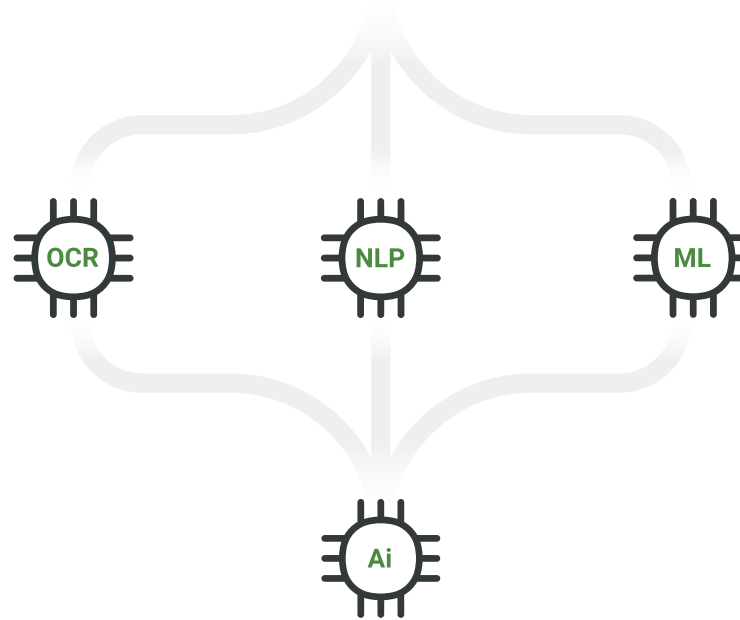

Advanced Data Sourcing Technology

Using unique data collection methods, we extract all relevant ESG information from raw data.

Smart ESG Graph

Once the data is extracted,
it's delivered to the relevant
business algorithm.

AI & Machine Learning

Advanced AI and machine learning processes compute the critical information related to sustainability intelligence including ESG, Certifications, Compliance, Regulations, Performance, Finance & Risk.

ESG Analytics and Validations of Business Rules

ESG risk & sustainability performance analysis ensures the best counter measures calibrated with market trends for enterprises and Sustainability linked loan recommendations for banks.

Flexible Access

Once validated, the data is pushed to greenfi Terminal, API/SDK, and Excel Add-In.

Flexible Access

The ultimate web/mobile access to analyse your data with ease.

API SDK

The supercharged API and Python SDK to power your decision making.

Excel Add-In

The simplest way to get your data straight into Excel.

Live DB

Stream directly into your BI tools.
