

Automate Due Diligence, Risk Assessment, Monitoring & Reporting

Our innovative solution simplifies the ESG data complexity, empowering you to make informed decisions faster.

Minimise manual efforts

Eliminate manual ESG data handling with GreenFi. Our sophisticated platform automates the collection and integration of ESG information, streamlining your sustainability reporting and analysis.

How GreenFi Works

Access, validate, and manage your sustainability data effortlessly, anytime, anywhere. Simplify ESG compliance, enhance decision-making, and free up time for strategic initiatives by automating your ESG data processes.

Data Ingestion:

- GreenFi collects millions of data points on asset locations.

Data Matching & Structuring:

- Locations are matched to businesses and organized for analysis.

ESG Connection:

- Asset/business data is linked to:
- ESG data sources
 - Industry-specific ESG models
 - Relevant risk models

Insights & Recommendations:

- Analysis generates insights aligned with stakeholder KPIs.
- Recommendations are provided.

Delivery:

- Insights/recommendations are accessible via:
- API
 - User Interface (UI) dashboards

AI Refinement (Feedback Loop):

- Deep learning analyzes usage patterns.
- Decision-making accuracy is improved over time.

Our clients include industry leaders and challengers
